LAIBA NADEEM

Full Stack Developer

+92 326 5940631 | laibanadeem631@gmail.com | www.linkedin.com/in/laiba-nadeem-707730362
laiba-nadeem479 | Lahore , Pakistan

PROFESSIONAL SUMMARY

Full-Stack Developer who builds responsive, production-ready web applications and puts AI to practical use inside them. Works across React, Next.js, TypeScript, Node.js, MySQL, REST APIs, authentication and cloud deployment. Shipped two live products: ResumeAI, an AI resume analyzer, and QuizMaster, a role-based school assessment platform with AI-generated content. Now deepening skills in cloud computing, DevOps and backend architecture.

TECHNICALSKILL

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Design
- **Backend:** Node.js, Next.js Server-Side Development, REST APIs, Authentication, Authorization
- **Database:** MySQL, Prisma ORM, SQL, Relational Database Design, Normalization, CRUD
- **AI / APIs:** Groq API, Hugging Face Inference API, AI Workflow Integration, Prompt Engineering
- **Cloud / Tools:** Vercel, Git, GitHub, VS Code, Postman, JMeter, XAMPP, phpMyAdmin

WORK EXPERIENCE

Full-Stack Developer Intern | CodNeura | 2026

- Contribute to full-stack web development using modern frontend, backend, database, and API technologies.
- Build and refine responsive interfaces and application workflows while collaborating within a development environment.
- Work with Git/GitHub, API integration, debugging, and deployment-oriented development practices.
- Explore practical AI integration to add intelligent functionality to web-based products.

Full-Stack Developer Intern | AUREX | 2026 - Now

- Develop and maintain responsive web applications using modern frontend and backend technologies.
- Implement application features, integrate REST APIs, and connect frontend components with backend services.
- Work with databases to support data management, application functionality, and reliable data flow.
- Use Git and GitHub for version control while troubleshooting bugs and improving application performance.
- Explore AI integration to enhance application functionality and deliver smarter user experiences.

PROJECTS

ResumeAI — AI Resume Analyzer

Next.js 15, React, TypeScript, Prisma, MySQL, NextAuth.js, Zod, Groq API

Github: https://github.com/laiba-nadeem479/resume-analyzer

- Built and deployed an AI resume analysis platform with ATS-style scoring, skill-gap insights and job matching.
- Implemented authentication, PDF/DOCX upload, structured AI analysis, validation, analytics and database-backed user management.
- Used the Groq API to turn resume data into structured, actionable career recommendations.
- Designed a responsive interface and full-stack architecture around one practical end-user workflow.

QuizMaster — Online Quiz System

Next.js, React, TypeScript, Node.js, MySQL, Tailwind CSS, Vercel

Github:https://github.com/laiba-nadeem479/online_quiz_system

- Led backend development for a school assessment platform with Admin, Teacher and Student workflows.
- Built authentication, role-based access, quiz creation, question management, class and section visibility, timed attempts, results and a leaderboard.
- Integrated the Hugging Face Inference API to generate educational images from teacher prompts.
- Designed the relational database and built the server-side APIs, testing workflows and deployment configuration.
- Handled debugging, environment configuration, cloud database integration and production deployment.

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY **2022-2026**
Hazrat Ayesha Sadiqqa Model College, Lahore

Relevant coursework: Web Development, Database Management Systems, Software Engineering, Object-Oriented Programming, Computer Networks, System Analysis & Design, Artificial Intelligence Fundamentals.

CERTIFICATE

ADVANCED PYTHON PROGRAMMING **2025**

University of Engineering & Technology (UET), Lahore | March 2025

- Focused on Python programming, problem-solving, and practical development concepts.

PROFESSIONAL INTERESTS

Full-Stack Engineering •Cloud Computing • Backend Development •DevOps • AI-Powered Products • REST APIs •Database Systems • Software Engineering
